BCIA Congratulates Austin Physical Therapists on Receiving Board Certification in Pelvic Muscle Dysfunction Biofeedback

Wheat Ridge, CO—The Biofeedback Certification International Alliance, formerly The Biofeedback Certification Institute of America (BCIA), is pleased to announce that Erin Nickenig, PT, DPT, Kimberlee Sullivan, PT, DPT, and Angela Treadway, PT, DPT from Austin-based Sullivan Physical Therapy have become Board Certified in Pelvic Muscle Dysfunction Biofeedback. These Physical Therapists join an elite group of professionals who have met the education, clinical and exam criteria required in order to become a certified provider of clinical biofeedback services to treat elimination disorders and pelvic pain syndromes.

The team of therapists at Sullivan Physical Therapy has a practice that provides services to treat women's health diagnoses and pelvic floor dysfunction for both men and women. Each of the therapists has earned their Doctorate in Physical Therapy and is a member of the American Physical Therapy Association.

Board Certification demonstrates professionalism and adherence to carefully developed standards as a health care provider. Procedures are consistent with the Department of Health & Human Services Guidelines, giving credibility and evidence that practitioners maintain knowledge and skill levels. Health care professionals who achieve BCIA Certification demonstrate commitment to professionalism by completing basic degree and educational requirements, learning to apply clinic biofeedback skills during mentorship, and passing a written examination.

The Biofeedback Certification Institute of America (BCIA) is the only institute recognized worldwide granting certification to biofeedback practitioners. BCIA was established in 1981 with the mission of protecting the general public by establishing strict standards for biofeedback practitioners. Currently, more than 1,500 health care professionals have achieved certification in general, EEG, or pelvic floor muscle dysfunction biofeedback. Many clinicians have more than one certification.
